- Truck craft has engineered the body and the subframe of the TC-300 to handle hauling and storage loads for chasis up to and including 19,500 lb GVW. The "no compromise" body design built mainly of A60 Galvanneal (cabinets and dump tub) provides 12,000 lb dump capacity and is designed for your 60" C.A. chasis. Dump body volume capacity is 3cu. Yds water level, and has 64cu. Ft of cabinet storage. Combo can handle 4'x8' sheets of material with tailgate closed. The entire side pack set is built of A60 Galvanneal steel for yeas of rust resistant life. Dumping is fast and efficient with a monarch 12 volt power unit and U.S. made 3-stage telescopic cylinder. The cylinder design allow the floor of the bed to be mounted 8-10" lower than a comparable scissors hoist unit.

A one-hand tailgate unlatch lever, low floor height, built in hand hold, and step bumper all combine to make worker entry to the dump body fast and easy.
